-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Objections

2. Claim 1 is objected to because of the following informalities: The claims must be presented on a separate page. Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Petit (FR2825983) in view of Whitlock (U.S. 1,950,465). Petit (FR2825983). Petit teaches a container 1 comprising a case body 2 provided with a cover 3 which includes a hinge boss at 3 rotatably attached to the case body through a hinge pin at lead line 40. The hinge allows the cover to open and close against the case body, as shown in figures 2a, 3a and 4a. The case body is still further provided with a pressure member at 21 or 22 which causes a frictional contact with the hinge boss at 21 (see figures 9-11) to reduce the rotation speed of the hinge boss. The pressure member is provided with a radius reduction portion (after the protrusion of the hinge boss) which is formed such that the resistance between the pressure member and hinge boss is reduced as the cover approached the open position.

Art Unit: 3781

Petit discloses the claimed invention except for the hook. Whitlock teaches that it is known to provide a container with a hook (see element 13). It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the container of Petit with the end of the lid opposite the hinge having a hook, as taught by Whitlock, in order to maintain the lid in the closed position.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art is cited for the hinge structure.

6. THIS ACTION IS NON-FINAL.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to NIKI M. ELOSHWAY whose telephone number is (571)272-4538. The examiner can normally be reached on Monday through Friday.
